

Plant Ecology in a Changing World (Biology 5460*) – A 3-credit course	
Class meets online on Tuesday (Section 1) or Thursday (Section 2) at 10:45 am – 12:05 pm Student groups are expected to arrange times to meet in groups at least once each week	
Instructor for Sections 1 & 2	Jim Ehleringer, jim.ehleringer@utah.edu
Teaching Assistant for Sections 1 & 2	Ms. Annie Carlile
Online office hours - scheduled as per individual student request	

This course is designed to provide a small-class and engaging experience. BIOLOGY 5460 is offered as an **online course**; all instruction is online via ZOOM. Of interested, self-guided campus walks are described at <https://www.plantecology.net/campus.html> where online maps accessed via a smart-phone will guide the learning experience. Overall, enrollment in this class is capped at ~20 students per section in order to offer BIOLOGY 5460 as a small-class and engaging experience where interactions and learning experiences are maximized.

The structure of BIOLOGY 5460 may seem new to many Biology majors	<ul style="list-style-type: none"> • BIOLOGY 5460 is offered online with both synchronous and optional asynchronous components. • All course instruction and discussion sessions are online. • This is a T or Th 3-unit, 3-hr class • Student groups will be self-organizing and will meet weekly to achieve the required 3 hours combined meeting time. • Self-guided campus walks provide opportunities to learn campus vegetation and campus sustainability activities. See details at http://plantecology.net/campus-overview. • Students will need reliable internet access, a computer, and good familiarity with writing, presentation, and spreadsheet software. • Two topics are presented through online videos weekly, with PDFs of all slides provided in CANVAS and at http://plantecology.net. • Online quizzes and problem sets accompany these topics. • The class is <i>flipped</i>. Students will be expected to have read and to have watched videos <i>prior</i> to class time. Class sessions focus on discussion, data analyses, and student-led activities in small groups. • Synchronous online class-time participation is required. • <i>Students are expected to work in online discussion groups.</i> • <i>Students will work on problem sets in groups; group composition will vary biweekly (assignment to a group appears in CANVAS).</i> • <i>Students are also provided opportunities to work in self-organized groups for papers, presentations, and, optionally, mini-exams.</i>
Asynchronous online components	<ul style="list-style-type: none"> • Instruction for 28 different course topics is through online videos. • Reading assignments for each topic are provided as PDF files. • Group-based problem sets are used to promote team work. • Students will self-organize into groups for development of student papers, presentation, and mini-exam preparation.
Synchronous online components	<ul style="list-style-type: none"> • Online class sessions meet once per week; participation is expected • Online student presentations occur at the end of the semester.

Topic, Problem Set, Examination, and Paper-due Schedule

Week	Week of	Topic	Lecture topic	Group	Submitted assignments
1	8/21/23	1	Adaptation, biodiversity, and the environment		no assignment due
		2	Climate constrains plant distributions		
2	8/28/23	3	Biome and climate relationships	A	20-pt problem set 1
		4	Desert and steppe ecosystems		
3	9/4/23	5	Grassland, savannah, and shrub ecosystems	A	20-pt problem set 2
		6	Forest ecosystems		
4	9/11/23	7	Alpine and tundra ecosystems		50-pt mini-exam 1
			Mini-exam 1 on lectures 1-6 (50 points) Due Sept 17		
5	9/18/23	8a	Microclimate 1 - the biophysical environment	B	20-pt problem set 3
		8b	Microclimate 2 - the biophysical environment		
6	9/25/23	9	Plants exchange energy with their environment	B	20-pt problem set 4
		10	The soil-plant-atmosphere continuum		
7	10/2/23	11	Plants acquire carbon and energy through photosynthesis		100-pt paper 1
		12	Photosynthetic responses and adaptation to light and temperature		
			Ecology and Climate Change paper Due Oct 8		
8	10/9/23		Fall Break		no assignment due
9	10/16/23	13	Plant adaptation to water stress	choose	20-pt problem set 5
		15	Changing ecosystems associated with water stress		
10	10/23/23	16	Plant architecture and carbon balance integrate plant activities	choose	20-pt problem set 6
		17	Resource allocation and phenology enhance performance		
11	10/30/23	19	Life history, and reproduction: its all about timing and provisioning		50-pt mini-exam 2
			Mini-exam 2 on lectures 8-19 (50 points) Due Nov 5		
12	11/6/23	22	Global anthropogenic changes occurring today that impact sustainability	choose	20-pt problem set 7
		23	Increased invasive species - characteristics of a serious invasive species		
13	11/13/23	24	Atmospheric changes impact plant performance and evolution		no assignment due
		25	Atmosphere and climate impact photosynthetic pathway advantages		
14	11/20/23	26	Global carbon balance and terrestrial subsidies reduce anthropogenic emission impacts		100-pt paper 2
		27	Warming impacts: phenology, fires, drought stress, species range changes		
			Proposed Ecological Policy paper Due Nov 22		
15	11/27/23	29	Envision Utah - what the pioneers saw, what we see, and what our children will see		no assignment due
		30	Restoration ecology - plant tolerances and putting the system back together again		
16	12/4/23	31	Managed ecosystems and land-use change		student policy presentations
		32	Urban ecosystems and green infrastructure		

Course Learning Objectives

As an interdisciplinary biology course, the learning objectives of this lecture course are:

1. To reinforce student knowledge of concepts in ecology and plant distribution, so they can describe how the principles of natural selection and mechanisms of genetic change have led to the observed diversity of life over both long-term as well recent evolutionary time frames
2. To reinforce student knowledge of structure and function concepts with expectations that students can apply knowledge of molecular, cellular, and organismal structures to explain the diverse set of functions – ranging from the subcellular to behavioral to ecological – that underlie the remarkable adaptations of individual organisms as well as responses of organisms within communities to different and sometimes rapidly changing environments
3. To reinforce student knowledge of systems-level concepts, including interactions within ecological cycles, so that students can explain how natural systems function and how humans and global changes impact vegetation at landscape and regional scales
4. To further develop critical thinking skills through data evaluation and group discussions such that students can apply the process of scientific reasoning and experimental design
5. To further develop collaboration skills through group projects, presentations, and exam preparation so that students can apply concepts and subdisciplinary knowledge from within and outside of biology to interpret biological phenomena, communicate, and work collaboratively to solve problems
6. To further expose students to the interactions between science and society, including the application of ecological knowledge to evaluate those interactions
7. To further develop writing skills through project assignments and written feedback
8. To further develop oral skills through presentations and group discussions

Achieving Learning Objectives

These course learning objectives will be achieved through online videos, group discussions, reading assignments, team-based assignments with feedback, and opportunities to develop and increase a student's oral and written communication skills. Assignments will require that students are familiar with word processing, spreadsheet, graphics, and presentation software (e.g., MS Word, Excel, and PowerPoint).

Text Books (optional) and Reading Materials

- PDF copies of all assigned readings for each topic are provided in CANVAS
- Lambers et al., *Plant Physiological Ecology* (optional reading through the Marriott Library)

CANVAS and Complementary Course Website

- The CANVAS site contains all class-related files.
- All assignments are available and submitted via CANVAS.
- Each topic is presented as a series of short videos on YOUTUBE (Plant Ecology in a Changing World)
- The website <http://plantecology.net> mirrors information to both students and the public.

Optional Online Discussion Sessions

If requested, *open, and unstructured* discussion sessions will be offered by the instructor to answer questions on topics presented in videos not answered during class time, to get additional experience with the modeling software exercises, and to cover other topics of student interest.

Structure of Scheduled Once-per-week ONLINE Meeting Times (Synchronous)

This class is flipped and offered online (exceptions are optional self-guided, on-campus walks).

The once-a-week flipped-class ZOOM class time will have the following structure:

- ***Student participation in discussions is expected*** and is valued at 10 points weekly points
- Scheduled in-class time will be via ZOOM, with both entire-group sessions (20 students) and smaller breakout sessions as appropriate.
- The first 20 minutes of synchronous online class time is allocated to a discussion of key topics presented in the topic videos which must be viewed by students prior to class.
- The next 60 minutes of synchronous class time is dedicated to activities, such as
 - Computer-based modeling activities related on topic themes presented in that week; students will work in groups
 - Data analyses and discussions of papers associated with that week's topics
 - Discussion of news-related events associated plant ecology (e.g., Siberian heat waves, extended drought in the southwest USA, or El Niño related fires in the Amazon)
 - Student-led presentations and evaluations of policy papers
 - Professional skills development (activities TBD)

Problem Sets (Asynchronous)

- Students will be randomly assigned into groups of 3 for each problem set.
- There are 7 group-based problem sets.
- Students are expected to work together through CANVAS, ZOOM, or other social media platforms to complete and submit a single problem set.
- Each problem set is worth a total of 20 points: 16 points are based on submitting the correct answers and 4 points based on the level of your participation.
- Students within a group will receive the same base score on that problem set (16 points).
- Within each group, students will evaluate the extent to which partners in the exercise contributed to the group effort. If 2+ students indicate that you did not actively participate in this group effort, you will not be awarded the 4 participation points (i.e., you are “kicked off the island” for lack of effort).
- After the first two problem sets, students will be randomly assigned to new groups.

Mini-exams (Asynchronous)

- There are two mini-exams during the semester and each is worth 50 points. Students will have 90 minutes to complete the mini-exams.
- These mini-exams will primarily focus on problem solving and evaluation of experimental data that is provided two weeks prior to the mini-exam. There will be a few multiple-choice and fill-in-the-blank questions for students most comfortable with those testing approaches.
- At the time of the mini-exam, students will download a common mini-exam and will have 90 minutes to complete the mini-exam and to then upload it onto CANVAS for grading.
- ***The instructor is trying a new approach for mini-exams. Students may choose to work individually or in pairs to take these two mini-exams.*** This approach will be discussed before the mini-exam to ensure that students understand this optional novel approach.
- During the mini-exam, students may work individually or in pairs on the mini-exam. The use of CANVAS tools or ZOOM is allowed. If students work in pairs, then their mini-exams must reflect both names and it is expected that identical mini-exam papers will be uploaded by each student.
- Mini-exams are taken online at the time of your choice during a 5-day period.

ADA Information

The Americans with Disabilities Act. The University of Utah seeks to provide equal access to its programs, services, and activities for people with disabilities. If you will need accommodations in this class, reasonable prior notice needs to be given to the Center for Disability and Access, 162 Olpin Union Building, (801) 581-5020. CDA will work with you and the instructor to make arrangements for accommodations. All written information in this course can be made available in an alternative format with prior notification to the CDA.

Addressing Sexual Harassment and Misconduct

Title IX makes it clear that violence and harassment based on sex and gender (which includes sexual orientation and gender identity/expression) is a civil rights offense subject to the same kinds of accountability and the same kinds of support applied to offenses against other protected categories such as race, national origin, color, religion, age, status as a person with a disability, veteran's status or genetic information. If you or someone you know has been harassed or assaulted, you are encouraged to report it to the Title IX Coordinator in the Office of Equal Opportunity and Affirmative Action, 135 Park Building, 801-581-8365, or the Office of the Dean of Students, 270 Union Building, 801-581-7066. For support and confidential consultation, contact the Center for Student Wellness, 426 SSB, 801-581-7776. To report to the police, contact the Department of Public Safety, 801-585-2677(COPS).

Student Safety

The University of Utah values the safety of all campus community members. Report suspicious activity. To request a courtesy escort, call campus police at 801-585-COPS (801-585-2677). You will receive important emergency alerts and safety messages regarding campus safety via text message. For more information regarding safety and to view available training resources, visit <http://safeu.utah.edu>.

Inclusivity, Diversity, Wellness, and Veterans

Names/Pronouns. Class rosters are provided to the instructor with the student's legal name as well as "Preferred first name" (if previously entered by you in the Student Profile section of your CIS account). While CIS refers to this as merely a preference, I will honor you by referring to you with the name and pronoun that feels best for you. Please advise me of any name change or pronoun preference so I can help create a learning environment in which you, your name, and your pronoun are respected. If you need any assistance or support, please reach out to the LGBT Resource Center. <https://lgbt.utah.edu/>

Wellness statement. Personal concerns such as stress, anxiety, relationship difficulties, depression, cross-cultural differences, etc., can interfere with a student's ability to succeed and thrive at the University of Utah. For helpful resources contact the Center for Student Wellness at www.wellness.utah.edu or 801-581-7776.

Diversity / Inclusivity. It is my intent that students from all diverse backgrounds and perspectives be well served by this course, that students' learning needs be addressed both in and out of class, and that the diversity that students bring to this class be viewed as a resource, strength and benefit. It is my intent to present materials and activities that are respectful of

diversity: gender, sexuality, disability, age, socioeconomic status, ethnicity, race, and culture. Your suggestions are encouraged and appreciated. Please let me know ways to improve the effectiveness of the course for you personally or for other students or student groups. In addition, if any of our class meetings conflict with your religious events, please let me know so that we can make arrangements. (Source: University of Iowa College of Education)

Veterans Center. If you are a student veteran, the U of Utah has a Veterans Support Center located in Room 161 in the Olpin Union Building. Hours: M-F 8-5pm. Please visit their website for more information about what support they offer, a list of ongoing events and links to outside resources: <http://veteranscenter.utah.edu/>. Please also let me know if you need any additional support in this class for any reason.
